

Decision Support Report

SIMULATED PLANNING INFORMATION - NOT A LIVE INCIDENT REPORT

Planning and preparedness use only

Executive summary

Galiwinku is the selected community for this report. The assessment combines published communications and facility records with the TC Lam exercise assumptions. The current model indicates high exposure, fragile communications redundancy and highly constrained access. All operational decisions require local verification.

SELECTED COMMUNITY

Galiwinku

Northern Territory

HIGH PRIORITY

VERIFY LOCALLY

Key indicators

Connectivity

2 / 5

Recorded mobile coverage

Access

1 / 5

highly constrained

Essential services

5 / 5

critical

Redundancy

1 / 5

fragile

Confidence

3 / 5

medium

Priority score and evidence

95 / 100

- Communications: Arnhem Fibre Program; Microwave radio
- Facilities: Ngalkanbuy Wellbeing Centre (Clinic, 0.4 km), Shepherdson College (School, 0.5 km), Galiwinku Health Centre (Clinic, 0.6 km)
- Access: highly constrained
- Scenario confidence: medium

Recommended resource

satellite terminal

Confirm availability, local need, safe access and trained personnel before dispatch.

Verification checklist

- ☐ Network service status
- ☐ Safe air and sea access
- ☐ Community communications need

Recommended next actions

1

Network service status

2

Safe air and sea access

3

Community communications need

Decision Support Report

SIMULATED PLANNING INFORMATION - NOT A LIVE INCIDENT REPORT

Planning and preparedness use only

Community evidence summary

Community	Communications	Access	Facilities	Resource
Galiwinku	Arnhem Fibre Program	highly constrained	Ngalkanbuy Wellbeing Centre (Clinic, 0.4 km), Shepherdson College (School, 0.5 km), Galiwinku Health Centre (Clinic, 0.6 km)	satellite terminal

Preparedness checklist progress

0% complete

☐ Download the local map and community pack

☐ Confirm emergency contacts

☐ Test backup power

☐ Test satellite or radio backup

☐ Confirm the community meeting point

☐ Review road and air access

☐ Prepare essential health information

☐ Run a no-signal drill

Data sources and limitations

Data source	Purpose	Limitations
NT Government Open Data	Community and mobile coverage locations	Published locations do not confirm current service availability.
OpenStreetMap contributors	Essential facility references	Community maintained data may be incomplete or outdated.
Bureau of Meteorology	Historical cyclone context	Historical tracks are not live forecasts.
RemoteReady NT exercise model	Priority and resource planning	Scenario assumptions are simulated and require local verification.

Important note

This report uses the best available published and exercise information at the time of generation. It is not a live incident report. Conditions may change quickly and all findings must be verified locally before operational decisions are made.
