

Decision Support Report

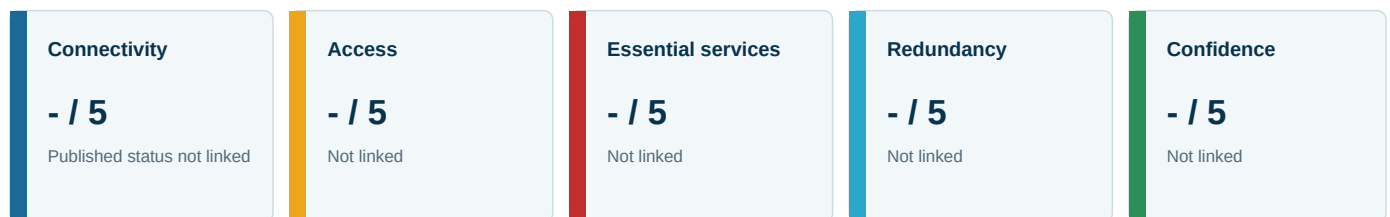

SIMULATED PLANNING INFORMATION - NOT A LIVE INCIDENT REPORT

Planning and preparedness use only

Executive summary

This report provides a whole-of-exercise view across 7 communities. It combines published location data, modelled exercise priorities and preparedness checks to support resource planning. Select a community on the Dashboard to generate a targeted community report.

Key indicators

Priority score and evidence

Average 63 / 100

- Published community and communications locations
- TC Lam historical and exercise context
- Essential facility references
- Preparedness checklist status

Recommended resource

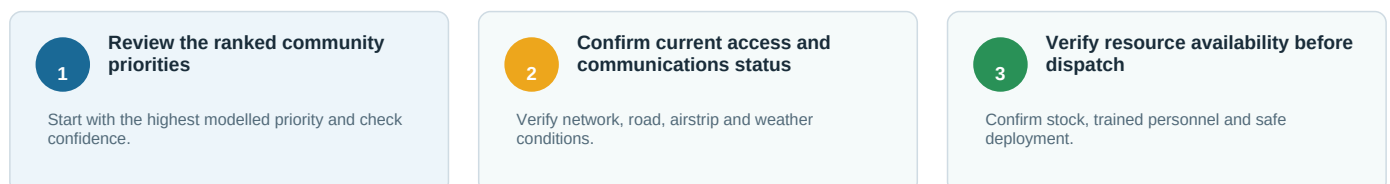

Not linked

Confirm availability, local need, safe access and trained personnel before dispatch.

Verification checklist

- ☐ Confirm current network status
- ☐ Confirm safe road and air access
- ☐ Confirm community need and local contacts

Recommended next actions

SIMULATED PLANNING INFORMATION - NOT A LIVE INCIDENT REPORT

Planning and preparedness use only

Community priority ranking

#	Community	Priority	Score	Resource	Verify
1	Galiwinku	critical	95	satellite terminal	medium
2	Milingimbi	high	84	portable cell	medium
3	Maningrida	high	76	backup power kit	medium
4	Gunbalanya	high	57	portable cell	low
5	Ramingining	medium	51	satellite terminal	low
6	Bulman	medium	39	satellite terminal	low
7	Yirrkala	medium	36	backup power kit	medium

Preparedness checklist progress

0 of 8 checks complete

No checklist items have been confirmed yet. Complete these before field deployment.

- | | |
|--|---|
| ☐ Download the local map and community pack | ☐ Confirm the community meeting point |
| ☐ Confirm emergency contacts | ☐ Review road and air access |
| ☐ Test backup power | ☐ Prepare essential health information |
| ☐ Test satellite or radio backup | ☐ Run a no-signal drill |

Data sources and limitations

Data source	Purpose	Limitations
NT Government Open Data	Community and mobile coverage locations	Published locations do not confirm current service availability.
OpenStreetMap contributors	Essential facility references	Community maintained data may be incomplete or outdated.
Bureau of Meteorology	Historical cyclone context	Historical tracks are not live forecasts.
RemoteReady NT exercise model	Priority and resource planning	Scenario assumptions are simulated and require local verification.

Important note

This report uses the best available published and exercise information at the time of generation. It is not a live incident report. Conditions may change quickly and all findings must be verified locally before operational decisions are made.
